PROFILE

I'm Courtland Gaba. I'm a front-end engineer living in Charleston, South Carolina. I love creating user-facing applications and websites using my skills in responsive web development. I am an alumnus of The Iron Yard's intensive 12-week program, graduating with a Certification of Front-end Engineering.

EXPERIENCE

Freelance Web Developer; Charleston, SC   January 2015-Present
- Excellent knowledge of web designing and development using the latest tools and techniques
- Excellent knowledge of web best practices and standards
- Familiarity with web production processes and techniques
- Ability to communicate with clients in a professional manner
- Ability to develop browser-compatible websites for various electronic devices

Wedding/Event Photographer; Myrtle Beach,SC   2010-Present
- Produced high quality wedding images, consistently exceeding studio and client expectations.
- Assisted in post production digital process through utilization of Adobe Photoshop CS6 and Adobe Lightroom to enhance light and exposure composition levels, remove blemishes, dodge and burn functions and various other digital tools
- Maintain a great rapport and professional relationship with client throughout.
- Gain trust with my clients for future photography needs.

Car Salesman   2012-Present
- Established ongoing relationships with new customers; providing excellent customer service during the purchase, and maintaining communication after the sell to ensure satisfaction.
- Demonstrated huge willingness to learn as much as possible
- Developed strong presence when speaking to customers on the phone or through email, convincing them to come in for appointments.
- Took whatever measures were necessary to finalize a sale, close a deal, and sell the vehicle.
